### **EXAMINER'S AMENDMENT**

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with John Garred Reg. No. 31830 on 08 September 2009.

### **IN THE CLAIMS**

Please amend independent claim 1 as follows:

1. (Currently amended)

A method for distributing a document to at least one destination, the method comprising:

receiving document data representative of an electronic document to be distributed into a document processing device including a processor and memory;  
associating each of a plurality of device queues with a unique document processing functionality; creating a job by appending to the document data at least one printer job language command, wherein the at least one printer job language command includes instructions for the distribution of the job via at least one of facsimile and e-mail by a document distribution queue and device data specifically identifying at least one device queue for distribution of the electronic document wherein the document distribution queue is not pre-associated with the document output destination;

associating each device queue with the document output destination;  
communicating the document data and at least one appended printer job language command to the document distribution queue via a data network;  
receiving, into the document distribution queue, the document data and at least one appended printer job language command; parsing, via the document distribution queue, the appended printer job language command from the document data;  
distributing the job by a processor, on the basis of parsed printer job language command, inclusive of the at least one printer job language command, to a facsimile destination or an e-mail destination corresponding to at least one device queue specified within the parsed printer job language command; and  
processing each job received into each device queue in accordance with the document processing functionality associated therewith.

### ***Reason for Allowance***

2. The following is an examiner's statement of reasons for allowance: The closest prior art of record (Zingher, U. S. Patent No. 5897260; Korfana, U. S. Patent Application Publication No. 2003/0182575 and Mastie et al., U. S. Patent No. 6498656) do not teach nor suggest in detail receiving document data and creating a job by appending to the document data at least one printer job language command, wherein the at least one printer job language command includes instructions for the distribution of the job via at least one of facsimile and e-mail by a document distribution queue and device data specifically identifying at least one device queue for distribution of the electronic

document wherein the document distribution queue is not pre-associated with the document output destination. Zingher, Korfana and Mastie respectively only teach generic print job allocation system, a system for including print job language wrapper in a document and a system for routing print jobs to one of a plurality of printers or print queues. Thus the prior arts of record taking singly or in combination do not teach nor suggest the above-stated limitation taking wholly in combination with all the elements of each independent claim.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

3. Claims 1, 5-9, 11 and 13-16 allowed.
